

RENEAL TEAM TANZANIA VISIT NGORONGORO

The Reneal Team Tanzania (Technician Team) was able to visit the Ngorongoro Conservation Area on December 27th, 2025, as one way of rewarding themselves for the great work they accomplished in 2025. This included continuing to support **120 Government schools** that benefited from the **Reneal International Education Outreach** project in Tanzania through the installation of computer laboratories (LAN) in schools, providing training on how to use the Reneal system, as well as the maintenance and troubleshooting of these computers whenever challenges arise. The main goal is to ensure that our laboratories operate at 100% efficiency, enabling both students and teachers to use them effectively.

Additionally, through this tour, Reneal Team Tanzania extends sincere appreciation to **Rene Bierbaum** the **Chief Operation Officer**, together with **Mr. David Nyangaka**, the **Country Director**, for granting them the opportunity to visit the Ngorongoro Conservation Area. During the visit, they were able to see various wildlife and bird species, enjoy the pleasant weather, and experience the beautiful and breathtaking scenery that was truly captivating to the eye.

We also extend our gratitude to the Tour guider from the tourism company **Noble Adventure Tanzania DMC** for providing us with excellent tourism services, including meals.

Finally, we believe that next year **2026**, we will perform well and continue to carry out our duties diligently under the leadership of our managers, ensuring that Reneal laboratories operate at **100%** efficiency and contributing to making Tanzania's schools digital.

*Prepared by, **Ashura Hamis***

Media Team.
