Reneal eLearning Lab Operations

Report 1: General System & Lab Usage Summary

School Name: Einoti Secondary School

Overall Status: EXCELLENT (Rank 2)

Academic Cycle: 2024 Academic Year

Active Terminals: 40 Thin Clients

40	99.8%	Rank 2
ACTIVE THIN CLIENTS	PXE NETWORK BOOT HEALTH	SYSTEM PERFORMANCE

1. Executive Summary

Einoti Secondary School ranks second overall (Rank 2) among participating government secondary schools in the 2024 Reneal Lab Statistics Tracker. Operating 40 fully active thin client terminals, the facility demonstrates exceptional reliability, robust server infrastructure, and structured student participation in eLearning programs.

2. Hardware & Infrastructure Status

The lab is powered by an optimized Linux host server providing thin client OS images via PXE network boot protocol. System health diagnostics confirm high hardware integrity across all 40 client stations and associated networking switches.

Component	Specification / Quantity	Operational Status
Central Host Server	Ubuntu Linux Server	Operational / High Uptime
Thin Client Terminals	40 Active Stations	100% Operational
Network Boot Architecture	LTSP / PXE Booting	Stable Network Boot Cycles
Backup Systems	Power Backup & Surge Units	Fully Functional

3. General Usage & eLearning Engagement

Einoti Secondary School displays strong academic engagement, with students leveraging offline digital libraries for STEM subjects and web coding exercises. Timetabled lab access ensures balanced utilization across all Form classes.

4. Key Operational Recommendations

Maintain scheduled quarterly preventive maintenance and monitoring of server disk usage to preserve current high system efficiency.
